# Tork Xpress Soft Multifold HT Adv 2p Z

130289

## Description

Provide good hand drying and comfort to your guests with the soft Advanced Tork Xpress® Soft Multifold Hand Towels that are gentle to the hands with a high quality feel. These towels are suitable for the Tork Xpress® Multifold Hand Towel Dispenser for medium traffic washrooms. It fits small places and provides both comfort and hygiene to your guests.

- A large, soft hand towel with a high quality feel that leaves a lasting impression
- Embossing enhances hand feel and maximizes absorbency
- Advanced quality for cost savings and high performance
- One-at-a-time dispensing for reduced consumption and increased hygiene
- Advanced
- Embossing
- Tork Easy Handling ® Packaging

| Material  | <p>Fresh fibres</p> <p>Essity has an ambitious target that all raw materials derived from wood-based fresh fibre used in the production of our products is certified either in accordance with the FSC® or the Program for the Endorsement of Forest Certification (PEFC™). In addition, all wood-based fresh fibre shall fulfil the FSC® Controlled Wood standard, including third-party verification. The Essity Fibre Sourcing Policy describes this in more detail and can be found on <a href="http://www.essity.com">www.essity.com</a>.</p> <p>Fresh fibre pulp is produced from softwood or hardwood. The wood is subject to chemical and /or mechanical processes where the cellulose fibres are separated out and lignin and other residuals are removed.</p> <p>Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.</p>     |
| Chemicals | <p>All chemicals (process aids as well as additives) are assessed from an environmental, occupational health and safety and product safety point of view.</p> <p>To control product performance we use additives:</p> <ul style="list-style-type: none"><li>• Wet strength agents (for Wipers and Hand Towels)</li><li>• Dry strength agents (are used together with mechanical treatment of the pulp to make strong products like wipers)</li><li>• For coloured papers dyes and fixatives (to secure perfect fastness of the colour) are added</li><li>• For printing products printing inks (pigments with carriers and fixatives) are applied</li><li>• For multi ply products we often use water soluble glue to secure the integrity of the product</li></ul> <p>In most of our mills we do not add optical brighteners.</p> <p>We do not use softeners for professional hygiene products.</p> <p>High product quality is secured through quality and hygiene management systems throughout production, storage and transport.</p> |

In order to maintain a stable process and product quality the paper manufacturing process is supported by the following chemicals/ process aids:

- defoamers (surfactants and dispersing agents)
- pH-control (sodium hydroxide and sulphuric acid)
- retention aids (chemicals that help to agglomerate small fibres to prevent fibre loss)
- Coating chemicals (that help to control the creping of the paper to make it soft and absorbent)

To reuse broke we use:

- Pulping aid (chemicals that help to repulp wet strong paper)

In the cleaning of our waste water we use flocculation agents and nutrients for the biological treatment to secure that no negative impact on water quality comes from our mills.
