

As pioneering market leaders, our Sharpsafe® and Clinisafe® products provide a **safe and sustainable** clinical waste management solution that incorporates our long history of innovation with robust, intelligent product design.

We drive continuous improvement to ensure the optimum solution is available to all our customers. Our products are designed to ensure best practice and deliver a waste management solution in accordance with the highest applicable product standards and legislation.

Sustainability is a huge focus of our drive for continuous improvement. The impact of Climate Change is an urgent global issue that continues to impact our future in a variety of ways.

Through our partnerships with industry experts, customers and end users, we are investing in sustainable product development and introducing eco-conscious solutions into the market.

We are proud to offer the **world's first full range** of sharps and clinical waste containers made from low carbon footprint recycled materials.
